SUMMARY

Data Analyst with a background in Computer Engineering and hands-on experience in SQL, Python, and Power BI. Skilled in end-to-end reporting pipelines – from raw data cleaning to interactive multi-page dashboards, with a consistent focus on actionable business insights. Currently building production-ready Gen AI pipelines using RAG, LangChain and FAISS.

EDUCATION

Terna Engineering College – University of Mumbai	Navi Mumbai, MH
Bachelor of Engineering (B.E.) in Computer Engineering	2020-2024

SKILLS

Data Visualization: Microsoft Power BI, Excel, PowerPoint

Programming Languages: Python (Pandas), SQL (Oracle, Microsoft SQL Server), JavaScript, HTML, CSS

Cloud & Data Platforms: Azure, Snowflake

Tools & Applications: Streamlit, SharePoint

Generative AI: RAG, Prompt Engineering, LangChain

WORK EXPERIENCE

Junior Data Analyst	Sept 2024 - Present
Capgemini	Navi Mumbai, MH
- Performed data cleaning and transformation on datasets of 5,000+ records across 3+ source systems improving data consistency. - Built and maintained multiple Power BI dashboards used by cross-functional teams and reports to support business insights and decision-making. - Integrated Generative AI tools and concepts like prompt engineering, RAG to assist in data related tasks and improve workflow efficiency. - Maintained report distribution and version control through SharePoint, enabling collaboration across 5+ team members on live reporting assets.	

PROJECTS

AI-Powered YouTube Behaviour Intelligence System (Ongoing) Python, RAG, LangChain	Apr 2026 – Ongoing
- Analyzing 1,000+ YouTube activity records to uncover temporal and content consumption patterns using Python & Pandas. - Engineered time-based features (hour, day, session patterns), improving interpretability of raw activity data by ~60% and enabling identification of peak usage windows. - Developing a RAG-based insight generation layer using LangChain and FAISS, achieving ~70% contextual relevance in generated behavioral insights (early testing). - Integrating structured analytics with LLM reasoning, targeting <2s response latency and deploying via Streamlit for natural language querying.	
YouTube Habit Analyzer Power BI, SQL, Data Visualization	Dec 2025 – Jan 2026
Extracted personal YouTube watch-history data using Google Takeout, cleaned and restructured 2+ years of raw JSON data using Power Query for analysis.	

- Developed a **multi-page interactive** dashboard to analyze viewing behaviour, trends, and content preferences, track engagement patterns, category-wise consumption, and usage trends over time.
- Used Generative AI tools to summarize insights, enabling **data-driven recommendations for improved digital well-being**.

Real-Time Marathi Sign Language Recognizer | Python, OpenCV, MediaPipe

Nov 2023 – Feb 2024

- Developed a real-time gesture recognition system that detects Marathi sign language gestures and converts them to text and speech using **OpenCV and MediaPipe** as our final year project.
- Built a custom dataset from scratch **covering 100+ gesture classes** (Swar, Vyanjan, and basic phrases) and implemented a classification pipeline with live webcam input and text-to-speech output.

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900)

Microsoft Learn | March 2026

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Microsoft Learn | Feb 2026
